Job Summary:

A Grade I Hydrographic Geophysicist is regarded as someone who is conversant with survey aspects of marine survey operations.

Hydrographic Geophysicists find underground oil and gas deposits

Using physical methods (gravitational, magnetic, electric) they measure the physical properties of subsurface earth to detect or infer the presence of oil or gas.

Geophysicists are involved in the acquisition, processing and interpretation of that data.

They can successfully participate in the Survey Project Team during operations and will report directly to the Senior Surveyor.

The Grade I Geophysicist is expected to coach and assess junior members of the Survey Project Team in line with the Competence Management Programme.

Entry Level Specifications:

- Satisfactory completion of the competence criteria for Hydrographic Geophysicist Grade II and be working towards Hydrographic Geophysicist Grade I
- Nominally 12 months including 80 days operational experience as a Hydrographic Geophysicist Grade II OR Relevant Industrial, military or academic experience in Survey discipline
- Valid and current offshore medical certificate that is acceptable in the region of the world in which they are employed
- Valid and current offshore survival certificate that is acceptable in the region of the world in which they are employed

Competencies:

- 1) The ability to use technical software packages
- 2) The ability to acquire & interpret data
- 3) The ability to manage data
- 4) The ability to write technical reports; including graphic presentation and mapping
- 5) Demonstrate a broad understanding of surveying principles
