

Competence 6

The ability to carryout and co-ordinate fault finding activities on ROV/Plough systems

This meets the requirements of IMCA This meets the requirements of IMCA R/RO2/000/04/04, R/RO2/000/08/08

Candidate Name:		Date:	
Activity Number (1,2, or 3):			

Performance Criteria: all of these must be assessed over a minimum of 3 work activities

Type of Evidence: Observation (O), Work Product (P), Written (W), Questioning (Q), Not Covered (N/C) or Not Applicable (N/A)

Performance Criteria		Type of Evidence
a)	Can locate and make technical information available for fault finding activities	
b)	Can allocate fault finding activities to technicians where appropriate	
c)	Can brief team on hazards that may occur during fault finding activities	
d)	Consistently demonstrates an awareness of hazards that can occur when fault finding on electrical and electronic systems	
e)	Can make use of system diagnostics to locate faults in the ROV/Plough system	
f)	Can confirm the correct operation of electronic circuits within the ROV/Plough system using standard test procedures	
g)	Can set up system parameters using information available on ROV/Plough computer (graphics pages, I/O pages etc.)	
h)	Locates faults in sensors and takes appropriate action to ensure the system is returned to working order within appropriate time scales	
i)	Locates faults in communication links using appropriate test equipment and procedures	
j)	Can supervise colleagues and instruct on fault finding and technical activities where appropriate	

Witness name: (If applicable in assessment plan)		Date:
