Grade I Surveyor

Competence 9

Witness name:

Assessor name:

(If applicable in assessment plan)

The ability to install and configure positioning systems

This meets the requirements	s of IMCA S	/S21/000/	//11	/11.1
-----------------------------	-------------	-----------	------	-------

Activity Number (1,2, or 3): Performance Criteria: all of these must be assessed over a minimum of 3 work activities Type of Evidence: Observation (O), Work Product (P), Written (W), Questioning (Q), Not Covered (N/C) or Not Applicable (N/A) Performance Criteria 7 Type of Evidence a) Demonstrates the ability to install and set up surface navigation equipment b) Demonstrates the ability to power up and configure the navigation equipment so that it is operational d) Demonstrates the ability to interface navigation equipment to survey system and check data transmission is operational d) Demonstrates the ability to rig and deploy acoustic transponders to the seabed pomonstrates the ability to selful recover acoustic transponders to the seabed Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors h) Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign conventions	Candidate Name:		Date:	
Performance Criteria: all of these must be assessed over a minimum of 3 work activities Type of Evidence: Observation (O), Work Product (P), Written (W), Questioning (Q), Not Covered (N/C) or Not Applicable (N/A) Performance Criteria Demonstrates the ability to install and set up surface navigation equipment Demonstrates the ability to power up and configure the navigation equipment so that it is operational C) Demonstrates the ability to interface navigation equipment to survey system and check data transmission is operational d) Demonstrates the ability to install and set-up ancillary survey sensors e) Demonstrates the ability to rig and deploy acoustic transponders to the seabed f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign	 Activity Number (1.2. or 3):			<u> </u>
Performance Criteria Demonstrates the ability to install and set up surface navigation equipment so that it is operational Demonstrates the ability to interface navigation equipment to survey system and check data transmission is operational Demonstrates the ability to install and set-up ancillary survey sensors Demonstrates the ability to install and set-up ancillary survey sensors Demonstrates the ability to rig and deploy acoustic transponders to the seabed Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign	•	I Leading to the same of the s		
Performance Criteria Type of Evidence a) Demonstrates the ability to install and set up surface navigation equipment b) Demonstrates the ability to power up and configure the navigation equipment so that it is operational c) Demonstrates the ability to interface navigation equipment to survey system and check data transmission is operational d) Demonstrates the ability to install and set-up ancillary survey sensors e) Demonstrates the ability to rig and deploy acoustic transponders to the seabed f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign			/C) or Not Applicable	(N/A)
a) Demonstrates the ability to install and set up surface navigation equipment b) Demonstrates the ability to power up and configure the navigation equipment so that it is operational c) Demonstrates the ability to interface navigation equipment to survey system and check data transmission is operational d) Demonstrates the ability to install and set-up ancillary survey sensors e) Demonstrates the ability to rig and deploy acoustic transponders to the seabed f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign	—————————————————————————————————————	5 (34) 11 () () () () () () () () ()	, -,	1
b) Demonstrates the ability to power up and configure the navigation equipment so that it is operational c) Demonstrates the ability to interface navigation equipment to survey system and check data transmission is operational d) Demonstrates the ability to install and set-up ancillary survey sensors e) Demonstrates the ability to rig and deploy acoustic transponders to the seabed f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign	Performance Criteria			Type of Evidence
Demonstrates the ability to interface navigation equipment to survey system and check data transmission is operational d) Demonstrates the ability to install and set-up ancillary survey sensors e) Demonstrates the ability to rig and deploy acoustic transponders to the seabed f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign	a) Demonstrates the ability to	install and set up surface navigation equipment		
transmission is operational d) Demonstrates the ability to install and set-up ancillary survey sensors e) Demonstrates the ability to rig and deploy acoustic transponders to the seabed f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign	b) Demonstrates the ability to	power up and configure the navigation equipment so tha	at it is operational	
d) Demonstrates the ability to install and set-up ancillary survey sensors e) Demonstrates the ability to rig and deploy acoustic transponders to the seabed f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign	C) I	interface navigation equipment to survey system and che	eck data	
e) Demonstrates the ability to rig and deploy acoustic transponders to the seabed f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign		install and set-up ancillary survey sensors		
f) Demonstrates the ability to safely recover acoustic transponders Demonstrates the ability to define vessel co-ordinate systems and determine 3D offsets for all positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign				
positioning and ancillary sensors Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign				
Demonstrates the ability to enter offset data into survey system, ensuring adherence to sign	Demonstrates the ability to			
n) I	positioning and ancillary ser	nsors		
	n) i	enter offset data into survey system, ensuring adherence	e to sign
