Job Summary:

A Subsea Asset Supervisor (Electrical) is regarded as someone who is fully conversant with the technical system requirements of diving equipment associated with subsea marine operations.

They can supervise and lead the Dive Technical Team during operations and will report directly to the Offshore Project Manager/Dive Superintendent when offshore.

The Subsea Asset Supervisor (Electrical) is expected to take part in the competence assessment process. As well as assess and coach/mentor, Asset Technicians and senior Asset Technicians.

Entry Level Specifications:

- Prior knowledge, skills and experience of Electrical/Electronic engineering gained through either: Trade qualification or Advanced academic education or Military training/qualification or Extensive experience in previous employment
- Completion of Senior Subsea Asset Technician competences either electrical or mechanical
- Current and valid survival certificate
- Current and valid medical certificate
- Complete employing company familiarisation course

Competencies:

- 1) The ability to implement and supervise company safety management systems in accordance with legislative and operating company requirements
- 2) The ability to manage the Dive Technical Team during emergency procedures as required on the vessel or installation where operations take place
- 3) The ability to supervise a team during all operational activities in a safe and reliable manner
- 4) The ability to implement effective management techniques in the workplace
- 5) The ability to liaise with both site and shore based client and company personnel (as appropriate)
- 6) The ability to understand and implement company management systems in the workplace
- 7) The ability to perform the role of Senior Subsea Asset Technician (Electrical) (applicable if the Subsea Asset Supervisor (Electrical) has to do this)
