Job Summary:

A Geomatic Survey Specialist is regarded as someone who is fully conversant with survey aspects of marine survey operations.

Using physical methods (gravitational, magnetic, electric) they measure the physical properties of subsurface earth to detect or infer the presence of oil or gas.

Geophysicists are involved in the acquisition, processing and interpretation of that data.

They can successfully manage the Survey Project Team during operations and will report directly to the Party Chief.

The Geomatics Survey Specialist is expected to coach and assess junior members of the Survey Project Team in line with the Competence Management Programme.

Entry Level Specifications:

- Education:
 - Hydrographic Survey or Ocean Mapping or Geoscience degree/ Diploma or similar education (Experience can compensate for lack of formally proven competence)
- Experience / Knowledge:
 - Meet or exceed IMCA competence criteria for Geomatic Surveyor
 - 5 or more years of experience in data processing offshore
 - Offshore Project related experience
 - or
 - Relevant industrial, military or academic experience in a survey related discipline, including relevant management experience (Training program can compensate for lack of experience)

Competencies:

- 1) The ability to perform work activities in a safe manner, to legislative and company operating requirements
- 2) The ability to install and configure processing and navigation software
- 3) Demonstrates the ability to undertake all technical activities relating to Geomatic Survey Operations
- 4) The ability to prepare, install and calibrate equipment for Geomatic Survey Operations
- 5) The ability to carry out all Data Management tasks relating to Geomatic Survey Operations
- 6) The ability to perform in a team, communicate effectively, supervise junior personnel and identify areas for personal improvement
- 7) The ability to perform work activities in accordance with company quality requirements
