Job Summary:

A Senior Geomatics Surveyor is regarded as someone who is fully conversant with survey aspects of marine survey operations.

Senior Geomatic Surveyors are involved with measurement, analysis and the management of data relating earth and the build environment.

Using physical methods (gravitational, magnetic, electric) they measure the physical properties of subsurface earth to detect or infer the presence of oil or gas.

Geophysicists are involved in the acquisition, processing and interpretation of that data.

They can successfully manage the Survey Project Team during operations and will report directly to the Party Chief.

The Senior Geophysicist is expected to coach and assess junior members of the Survey Project Team in line with the Competence Management Programme.

Entry Level Specifications:

- Education:
 - Hydrographic Survey or Ocean Mapping or Geomatics degree or similar education (Experience can compensate for lack of formally proven competence)
- Experience / Knowledge:
 - Meet or exceed IMCA competence criteria for Senior Data Processor
 - 5 or more years of experience in data processing offshore
 - Or
 - Relevant industrial, military or academic experience in a survey related discipline, including relevant management experience (Training program can compensate for lack of experience)

Competencies:

- 1) The ability to Implement and maintain a safe working environment, to legislative and company operating requirements
- 2) The ability to ensure effective management of software relating to Geomatic Surveys
- 3) The ability to operate the data processing software to initiate, perform and complete the project tasks
- 4) The ability to apply, operate and supervise the use of equipment during Geomatic Surveys
- 5) The ability to ensure effective management of data relating to Geomatic Surveys
- 6) The ability to provide Supervision and Leadership of Survey Teams
- 7) The ability to apply, operate and supervise the use of Geomatic Software Suites
